DESIGNED BY YOU. **FOR YOU.**

Whether its for your boat, tools or even a small workshop, you can create a Garden Master shed to meet your needs... exactly how you want it to function, exactly how you want it to look. No compromises.

And our new online app will make this even easier. Change the dimensions, roof style, colours and look of your shed with ease, as well as add and remove skylights, windows, hinged doors and sliding doors.

And when you're finished, you can share your 3D shed design with your friends or even email it to yourself for later reference. And we'll provide you with an accurate quote on your own, individual shed design.

GM
SHEDS

Design your very
own shed with our
online shed builder!

"I am very happy with all aspects of the shed. The service especially. I have no hesitation in recommending your product."

NC – Nelson

CUSTOM-BUILT. BY YOU.

Garden Master is New Zealand's most customisable kit-set garden shed brand. Whatever the shape of space you have, or the amount you need to store, we can build a Garden Master just for you. Big, small, tall and narrow, or short and wide – make it your own!

Built to last

High tensile steel, formed into a deep ribbed profile, provides the inherent strength of your shed. Closely spaced ribs, with heavy gauge channels, form a strong panel that acts as a tension membrane when assembled, making extra framework unnecessary.

New Zealand made

Our family will ensure you get the very best service at the right price. All our materials are sourced only from reputable suppliers and roll-formed in our own factory.

Easy to build

Erecting your shed couldn't be easier! With some basic tools and a pair of helping hands, you'll have a Garden Master up in no time. We even include a free riveter with every shed to make sure you do a professional job.

There's also an Assembly Instruction App to guide you along – just search for Garden Master in your App Store.

If DIY is not your thing, then we have approved installers all around New Zealand – just ask in-store for your nearest installer.

**FREE
RIVETER
INCLUDED**

Tools required

Battery or electric drill

Tape measure

Ladder

Non-slip gloves

Good covered shoes

Eye protection

A pair of helping hands

NEW! 25 year warranty

If any component of our shed fails – we will replace it! Make sure your shed is built and secured to our instructions as a minimum. Warranty does not cover damage or loss through act of God. Please inform your insurance provider. Phone 0800 807 433 for tips on high wind sites.

Kiwi know-how

Family owned and operated, we've been supplying New Zealanders with garden sheds since 1974.

Easy to transport and handle

All Garden Master sheds are now supplied in just one cardboard box and, for longer sheds, also a plastic wrapped channel pack. This makes them easier to transport to site, easier to handle and much easier to manoeuvre around any tight corners.

DESIGN YOUR SHED IN 4 EASY STEPS

1

SPECIFY YOUR SIZE & ROOF STYLE

Designing your Garden Master shed is a simple, 4 step process – and building it is even easier! Start by choosing the appropriate size – determined by both the available space and what you intend to store in it. You can either choose a standard size (see opposite) or create your own size on the grid provided.

SLOPING ROOF

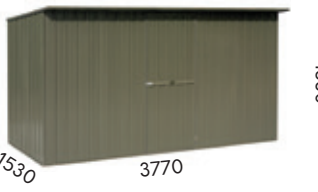

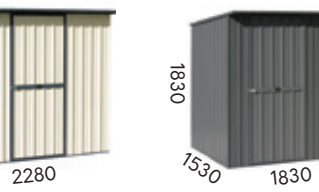

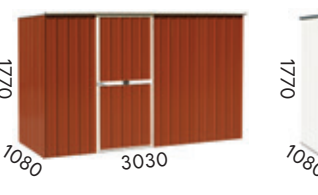

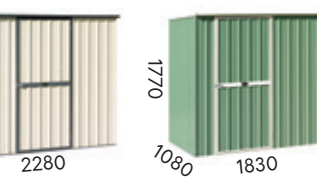

Increased height at the front of the shed allows water to run to the rear.

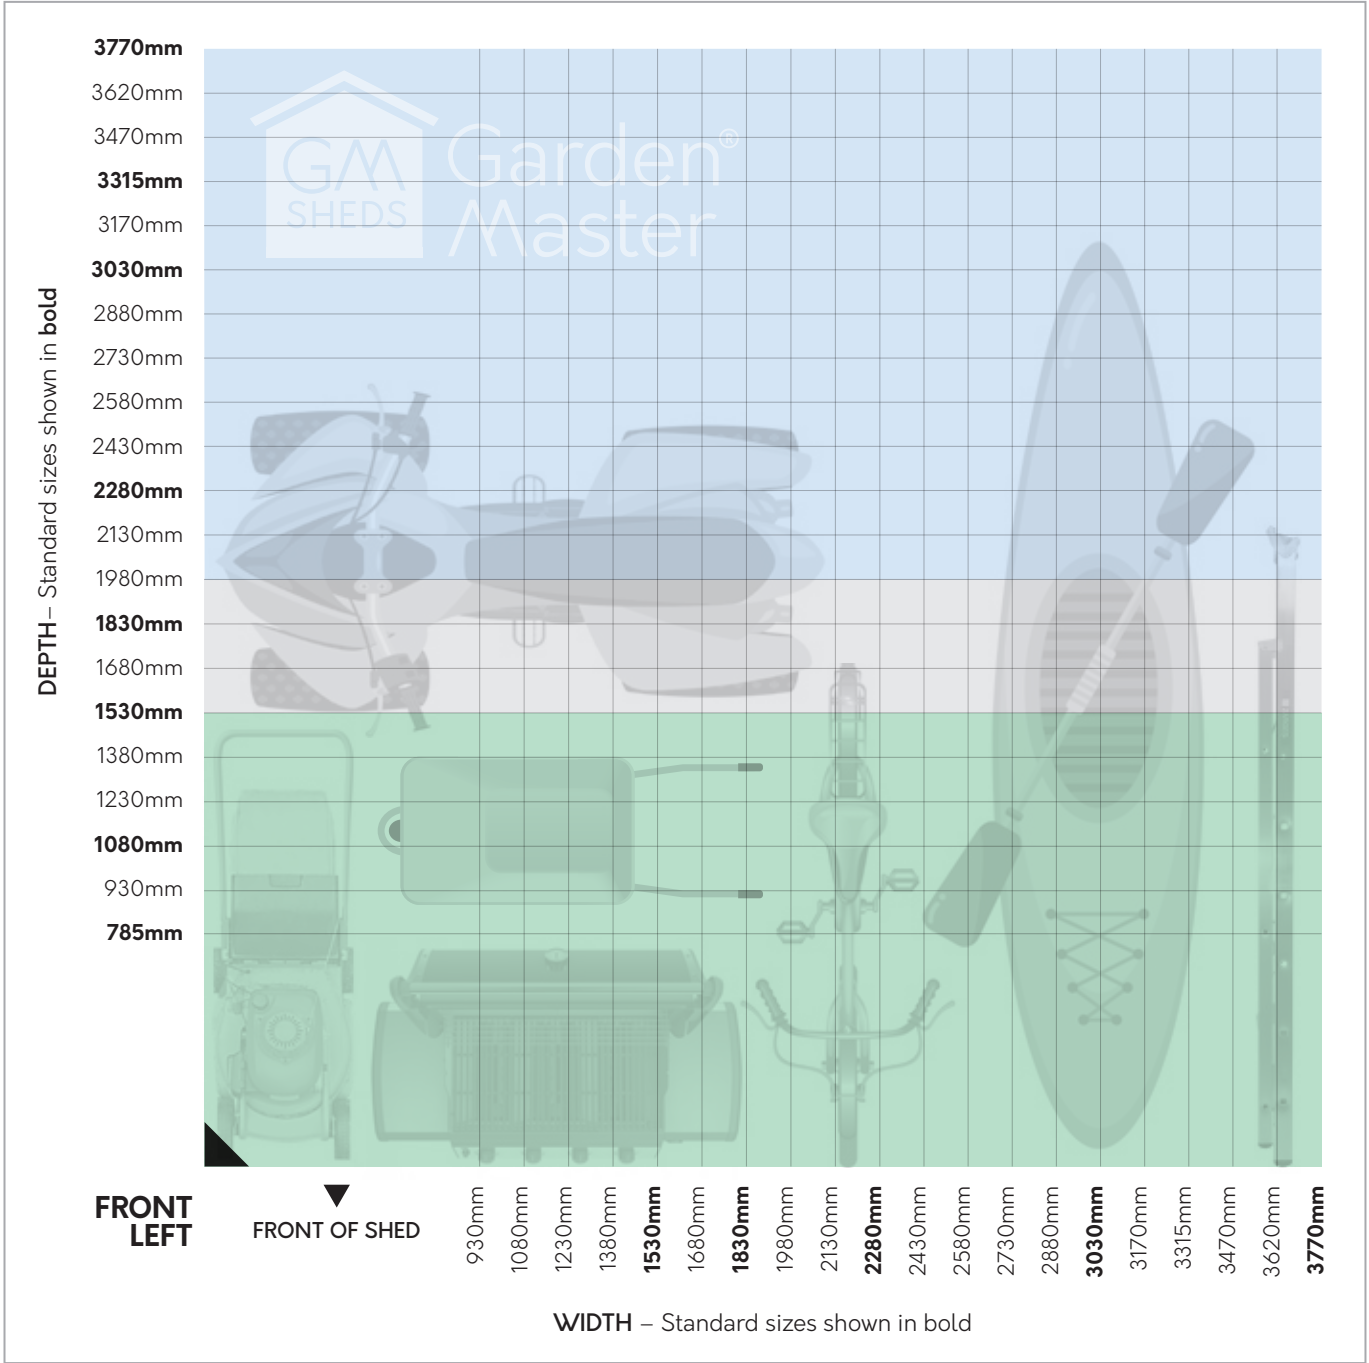

GABLE ROOF

Higher in the centre, this style allows water to run to both sides of the shed.

OUR RANGE OF STANDARD SIZES:

<div>GM3838</div> <div>Area: 14.21m² Height in centre: 2120mm</div> <div></div>	<div>GM3033</div> <div>Area: 10m² Height in centre: 2120mm</div> <div></div>	<div>GM3030</div> <div>Area: 9.18m² Height in centre: 2090mm</div> <div></div>	<div>GM3830</div> <div>Area: 11.42m² Height in centre: 2090mm</div> <div></div>		
<div>GM3823</div> <div>Area: 8.60m² Height in centre: 2025mm</div> <div></div>	<div>GM3023</div> <div>Area: 6.91m² Height in centre: 2025mm</div> <div></div>	<div>GM2323</div> <div>Area: 5.20m² Height in centre: 2025mm</div> <div></div>	<div>"I'm very happy with the sheds, they went up quickly once the floor was constructed. And, as the floors are level and square, there were no adjustments required."</div> <div>MH – Hamilton</div>		
<div>GM3818</div> <div>Area: 6.90m² Height at front: 1980mm</div> <div></div>	<div>GM3018</div> <div>Area: 5.54m² Height at front: 1980mm</div> <div></div>	<div>GM2318</div> <div>Area: 4.17m² Height at front: 1980mm</div> <div></div>	<div>GM1818</div> <div>Area: 3.35m² Height at front: 1980mm</div> <div></div>		
<div>GM3815</div> <div>Area: 5.77m² Height at front: 1980mm</div> <div></div>	<div>GM3015</div> <div>Area: 4.64m² Height at front: 1980mm</div> <div></div>	<div>GM2315</div> <div>Area: 3.49m² Height at front: 1980mm</div> <div></div>	<div>GM1815</div> <div>Area: 2.80m² Height at front: 1980mm</div> <div></div>	<div>GM1515</div> <div>Area: 2.34m² Height at front: 1980mm</div> <div></div>	
<div>GM3011</div> <div>Area: 3.27m² H. at front: 1830mm</div> <div></div>	<div>GM2311</div> <div>Area: 2.46m² H. at front: 1830mm</div> <div></div>	<div>GM1811</div> <div>Area: 1.98m² H. at front: 1830mm</div> <div></div>	<div>GM1511</div> <div>Area: 1.65m² H. at front: 1830mm</div> <div></div>	<div>GM2308</div> <div>Area: 1.78m² H. at front: 1830mm</div> <div></div>	<div>GM1508</div> <div>Area: 1.19m² H. at front: 1830mm</div> <div></div>

Which roof do I need?

Plot the width and depth of your shed – if the back right corner of your shed is in the:

BLUE SECTOR

= gable roof

GREY SECTOR

= sloped roof, but can be upgraded to gable

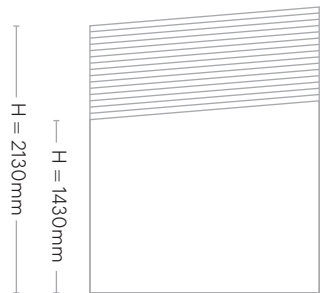

GREEN SECTOR

= sloped roof

Choosing the height of your shed

The height (H) of your shed is the height of the back face.

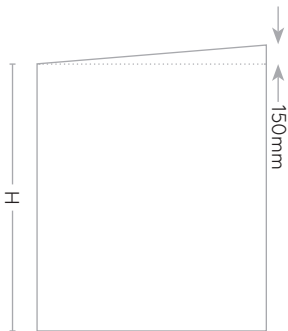

The maximum value of H is 2130mm, and you can decrease this in 50mm increments down to 1430mm.

Calculating the maximum height of your shed

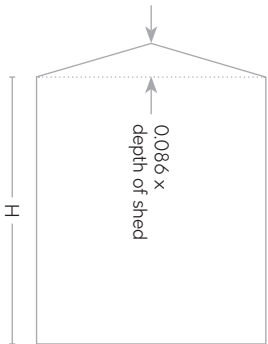

For sloping roof sheds:

The height of the front of your shed = $H + 150\text{mm}$.

For gable roof sheds:

The height in the centre of the gable = $H + (0.086 \times \text{depth of shed})$.

CONCRETE CLAMPS

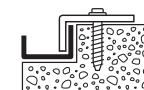

Flat floor clamps

For existing flat concreted areas
using concrete screws. (1 Pack =
8 clamps and 8 concrete screws)

Recessed floor clamps

For specially poured concrete floors.
We recommend the recessed concrete floor
system as it provides greater protection from
wind lift and moisture entering under your shed.
(1 Pack = 8 clamps and 8 concrete screws)

4 CHOOSE YOUR COLOURS

Build your shed and get a quote at
gardenmastersheds.co.nz

Personalise your shed with our Mix & Match system. You can customise the look of your shed to suit any landscape.

Whether you prefer to have your shed all in one colour, or mix roof, wall and trim colours, we will accomodate your needs.

GM
SHEDS

Use our online
shed builder to
try out colour
combinations!

Colours shown are reproduced as accurately as the limitations of the printing process allows. Please ask your retailer to see a genuine Colorsteel colour chart.

Recently we purchased one of your sheds, and within two days of putting it up we had wind gusts of 250kph coming down on us from Mount Hutt. We weren't able to stand outside our house, but the shed withstood the storm battering with no problems at all! We were truly impressed.
